Conrad is a Partner in the Technology Group, the Fintech Group and the Retail and Consumer Markets Group. His practice focuses on providing pragmatic legal solutions to a variety of clients, ranging from start-ups to multinational companies, in connection with their strategic commercial transactions involving technology outsourcing, licensing, data security, systems development, software-as-a-service (SaaS), cloud computing, e-commerce, distribution and competitive/public procurements. Additionally, he counsels clients on the technology, privacy and transitional service aspects of merger and acquisition transactions.

Prior to practising law, Conrad was a video game developer and the lead programmer on a variety of award-winning video games for mobile devices and consoles. His interests in the intersection of data and software grew from his prior work experience, which has contributed to his deep understanding and passion for emerging technologies, including artificial intelligence, big data and blockchain. Leveraging his unique perspectives, Conrad regularly advises clients on the legal and business challenges specific to transformational technologies.

In 2014, Conrad completed a three-month secondment to the corporate finance branch of the Ontario Security Commission and, in 2016, Conrad completed a six-month secondment to the procurement group of a leading Canadian telecom company.

Select Experience

- Structuring and negotiating IT infrastructure and management services agreements on behalf of a government agency
- Assisting a leading Canadian bank on its procurement of an AI-powered SaaS solution from a foreign service provider and mitigation of associated information security and privacy risks
- Advising a media company on open source risks in relation to its development of a predictive AI platform
- Advising a private equity firm on the technology and privacy aspects of its acquisition of an innovative healthcare service provider's token offering platform.
