Brad Nicpon is a partner in McCarthy Tétrault's Real Property & Planning Group in Toronto. His practice focuses on infrastructure, construction, energy, project development and public-private partnerships (P3s). He also advises on real property development and the purchase and sale of infrastructure and real property assets.

Brad has significant legal experience in both the Canadian and international infrastructure markets. He has also held senior government roles in the infrastructure space, having served as Director of Policy to two Ontario Ministers of Infrastructure. In that capacity he advised the Minister, the Office of the Premier and other senior government decision-makers on all major infrastructure matters. These included the government's priority subway projects, the Transit-Oriented Communities program, Ontario's first Unsolicited Proposals Framework and the portfolio of Provincial projects being delivered using the P3 model.

Domestically, Brad has advised various levels of government and government agencies in respect of the construction, financing, operation and maintenance of a variety of public infrastructure projects, including hospitals, law enforcement facilities, sporting event facilities, entertainment venues and transit/transportation projects. Brad has worked extensively with Infrastructure Ontario to deliver projects using their P3 model, including ten DBFM and DBF projects. He also advises project owners and lenders on energy projects (including traditional and renewable generation, as well as transmission projects) and residential and commercial real estate projects. Brad also regularly advises on the acquisition and disposition of infrastructure assets.

While working at a magic circle firm in London, UK, Brad advised on and led infrastructure transactions around the world, including Asia, the Middle East, the UK, Europe and North America. His experience included the drafting and negotiating of legal arrangements to construct, operate, finance, purchase and sell infrastructure assets across various classes. Brad worked extensively on traditional (coal, oil shale and gas) and renewable (solar, offshore wind and onshore wind) power generation, however his international experience also includes transactions in the heavy industrial, mining, railroad and real property sectors.

Brad's work in the UK included advising the project owner on the construction, operation and financing of two of the largest offshore wind projects in the world, the Race Bank and Walney Extension projects, as well as the sale of a 50% interest in each project to a third party investor.

Promoting knowledge in the infrastructure sector is important to Brad. Both in Toronto and globally he has run seminars and teaching modules on infrastructure and project development topics. In 2018 he designed and delivered a seminar to over 150 participants in Tokyo, Japan on the contractual arrangements underpinning the development of offshore

wind projects. He has also participated as a volunteer on industry panels, as a judge for student infrastructure business case presentations at the Schulich School of Business and as a facilitator for the Sustainable Infrastructure Fellowship Program of the Investor Leadership Network (an initiative of the G7).

Brad is currently serving as Chair of the National Awards Committee of the Canadian Council for Public-Private Partnerships.

In March 2022, Brad was appointed by the Lieutenant Governor of Ontario, on the recommendation of the Minister of Labour, Training and Skills Development, to serve as one of five members of the Ontario Portable Benefits Advisory Panel. The panel is tasked with providing policy recommendations to the government on the design of a portable benefits program to deliver workplace benefits to Ontario workers who do not have access to such benefits.

Brad received an LL.B. from Osgoode Hall Law School in 2007, an M. Sc. in Political Theory from the London School of Economics in 2004 and a B.Sc. (Hons) in Genetics and Political Science from the University of Western Ontario in 2003.

Brad qualified as a Barrister and Solicitor of the Province of Ontario in 2008, and as a Solicitor of the Senior Courts of England and Wales in 2016.

SIGNIFICANT REPRESENTATIVE WORK INCLUDES:

Canadian Work

- Acting for Infrastructure Ontario and Metrolinx on the Government of Ontario's Transit-Oriented Communities program, which aims to develop and densify land, deliver housing, promote economic development and capture land value to offset the cost of transit construction at stations on the Government's new priority Toronto subway projects
- Acting for Waterfront Toronto on its development of the portion of Toronto's waterfront known as the Quayside Lands. The project aims to deliver a sustainable and resilient community consisting of a robust mix of uses, new economic opportunities and new community services
- Acting for a US-based multinational energy developer in respect of its portfolio of generation and storage projects in Ontario
- Acting for a major Canadian infrastructure investor in its acquisition of a digital infrastructure platform
- Acting for a major international infrastructure investor in its acquisition of a Canadian geothermal heating/cooling business
- Acted for InstarAGF in respect of its negotiation of service, maintenance, warranty and availability agreements for two of its Canadian wind farms with Siemens Gamesa Renewable Energy Limited
- Acting for Niagara Health System and Infrastructure Ontario in the procurement of the new 469 bed South Niagara Hospital P3 DBFM project
